

Universal Remote Control

Immediate access to hotel services, amenities, and room control

Give your guests instant access to all you have to offer through a customized remote control. This fully programmable remote can control a TV or a set-top box and has dedicated buttons for quick access to hotel services, TV, movies on demand, and music on demand. Hot key buttons let you offer guests one-touch access to revenue generating amenities such as dining, spa services, in-room fitness, resort activities, and more. The Life|point® InTouch remote also allows guests to control room lighting and temperature.

The lightweight contoured remote fits comfortably in any hand and an ambient light sensor activates the backlight when the remote is picked up in low-light conditions. Since the remote's buttons are grouped logically and the button sizes vary by function, buttons are found easily just by touch.

As a hotelier, you can customize the remote by branding the hotel logo, graphics, and colors on the "home" key and by using the head-to-head learning capability for all of the keys. The Life|point InTouch remote works hand in hand with Life|ware Hospitality Solutions to help you deliver the experiences and services that guests have come to expect.

HIGHLIGHTS:

- ▶ Ambient light sensor disables backlight operation in daytime lighting conditions
- ▶ Motion sensor activates backlight when remote is picked up in low-light conditions
- ▶ Complete room control and entertainment and access to hotel amenities and services from TV
- ▶ Custom-brand the "home" key with your own logo, graphics, and colors
